PROFESSIONAL SUMMARY

Technology and operations leader with an engineering background and international experience across Europe, North America, and Asia. Currently operating in a senior regional engineering role in Japan, leading response to production-critical incidents, coordinating cross-functional stakeholders, and supporting business continuity across complex industrial automation and logistics environments. Combines deep technical expertise in automation, software architecture, and systems integration with crisis management, stakeholder alignment, conflict resolution, process improvement, and operational decision-making. Previous experience as an Operations Manager and Business Owner provides hands-on responsibility for teams, customer relationships, cost control, service quality, and execution under pressure. Graduate studies in Information Technology and Business Administration support continued progression toward broader regional and operational leadership.

WORK EXPERIENCE

Fellowship Co., Ltd. | 株式会社フェローシップ.

Tokyo, Japan

Senior Industrial Automation Architect & Software Engineer

2026 - Present

Global Career Engineer Unit | Regional Engineering & Operations

- Lead regional response to high-impact incidents affecting customer production and logistics operations across Asia, coordinating recovery priorities and service continuity.
- Act as a senior escalation point between customer operations, regional stakeholders, and international engineering teams during business-critical situations.
- Coordinate cross-functional resolution across software, databases, infrastructure, automation, and operational workflows, ensuring clear ownership and execution.
- Align customer expectations, production requirements, technical risks, and engineering priorities during complex or time-sensitive incidents.
- Lead root-cause investigations and translate findings into corrective actions, reliability improvements, and operational recommendations.
- Manage customer-facing communication throughout critical incidents, providing clear updates on impact, risk, recovery actions, and next steps.
- Contribute to knowledge transfer, mentoring, and continuous improvement by identifying recurring failure patterns and operational risks.

FEAB Sistemi S.r.l. – E80 Group Contractor

Modena, ITALY

Software Engineer

2024 - 2026

- Delivered industrial automation software for international production and logistics environments, using C#, SQL, APIs, and system integration across complex warehouse and material-handling systems.
- Took ownership of complex production issues spanning application logic, databases, infrastructure, interfaces, and operational workflows.
- Supported business continuity during critical production downtime, coordinating troubleshooting with customer teams and engineering stakeholders to drive safe and timely recovery.
- Performed root-cause analysis on recurring or high-impact issues and contributed to corrective changes aimed at increasing reliability and reducing operational risk.

Hospitality Corp.**Toronto, CANADA*****Operations Manager*****2023 - 2023**

- Supervised day-to-day operations during peak-demand periods, ensuring service continuity, quality standards, and efficient execution.
- Coordinated staff activities and operational priorities in high-pressure environments, resolving issues affecting daily operations and customer service.
- Maintained safety, hygiene, service quality, and compliance standards during high-traffic periods.
- Managed opening and closing responsibilities, cash operations, daily financial controls, and operational accountability.

Hastec LTD**Tokyo, JAPAN*****Ground operations Specialist, Property Management*****2022 - 2023**

- Trained and onboarded new staff, providing practical guidance on operating procedures, service standards, and efficient task execution.
- Coordinated day-to-day ground operations across maintenance, service, and property-related activities, supporting resource allocation, safety compliance, and operational continuity.

Caffetteria Aurora**ITALY*****Business Owner,*****2020 - 2023**

- Held end-to-end responsibility for daily business operations, customer experience, suppliers, cost control, staffing, and service delivery.
- Led the business through the operational disruption of COVID-19, adapting priorities, processes, and cost structure to maintain continuity under highly uncertain conditions.
- Implemented local sourcing and waste-reduction initiatives that reduced operating expenses by approximately 15% annually.
- Managed competing priorities across customers, suppliers, staffing, service quality, and financial constraints, resolving operational issues directly.
- Developed and supported staff through hands-on leadership, training, clear expectations, and day-to-day problem-solving.

TECNOMECC BORGHI S.R.L**Modena, ITALY*****Internship*****3 months; 2018**

- Developed electronic systems and created electrical panels for ceramic automation equipment, automated tile handling processes to enhance production efficiency, coordinated logistics for timely delivery and installation of machinery, performed machining and mechanical assembly, and executed wiring of electrical systems adhering to safety standards, contributing to overall performance optimization.

Aeroporto Di Parma So.Ge.A.P. S.P.A.**Parma, ITALY*****Internship*****3 months; 2018**

- Technical Documentation Management and Coordination with Ground Staff: During my internship at the airport, I translated and managed technical documentation, closely collaborating with ground staff. This experience allowed me to develop key skills in understanding and processing complex technical information, as well as improving my communication and coordination abilities in a dynamic, result-oriented environment.

EDUCATION

Queen Mary University of London (UoL)	London, UK
MBA	2028

University of the People	Pasadena, CA, USA
Master's degree, Information Technology	2026

University of the People	Pasadena, CA, USA
Bachelor's degree, Computer Science	

University of the People	Pasadena, CA, USA
Associate degree, Computer Science	

Intercultural Institute of Japan	Tokyo, JAPAN
Japanese Language	

Istituto Nobile Aviation College	ITALY
Technical Diploma in Transport and Logistics with Aeronautical specialization.
